

MASQUERADING MILK.

Chemistry Substantiates Little But-tercup's Assertion That "SOME THINGS ARE NOT WHAT THEY SEEM"

A Little Coloring Makes Rich Cream Out of Skim Milk.

DISEASES LURK IN THE MILK FITCHER

At the time when Hippocrates prescribed milk for dropsy, and the Greek and Roman made butter for external application only, milk was recognized as a valuable article of food, second in importance only to bread. Indeed, milk has often superseded the staff of life as an article of diet—a fact not to be wondered at when it is considered that milk may be used without the intervention of unskilled cooks. Days when man's ingenuity has not been limited by the endless variety of food stuffs which when man's stomach, milk in many cases formed all three courses of his dinner.

Long ages before the advent of the paraffin milk can, the "cream" was won by churning the milk, and the butter was separated from the milk. The butter was then churned, and the milk was separated from the butter. The butter was then churned, and the milk was separated from the butter. The butter was then churned, and the milk was separated from the butter.

Chemically, milk consists of water, albumen, casein, sugar, vitamins and a small amount of lime. These ingredients, exclusive of the fat, are dissolved in the water, while the fat is held in suspension in the form of small globules. In the process of churning, it is liberated by the rupture of the enclosing envelope, so that, strictly speaking, butter is not "made" but is separated from the milk. The fatty matter in a given quantity of milk varies greatly in different species of animals and in different individuals of the same species.

The milk sugar which all milk contains is lactose. This is often noted just before becoming absolutely sour, milk loses its sweet taste, the sugar having become partly converted into lactic acid, similar to the white of egg and the casing in the cheesy matter.

Condensed milk consists, or ought to consist, simply of milk from which a portion of the water has been removed, and to which sugar has been added as a preservative. It is wholesome and nutritious, being essentially useful without fresh cream.

The quality of milk varies greatly according to various conditions, such as food, care and attention to the cow, her age, condition of health, the quality of the feed, the presence of sophistication, milk varies to the greatest extent in the amounts of cream and of water present in it, and it is on this that the most usual and most important tests are based. Unfortunately, though, many of these tests can be conveniently applied in the household.

Milk is one of the most commonly sophisticated articles of food on the market. The writer has examined milk samples from various sources and has found that many of them are not what they seem to be. The result of the examination is as follows:

WHAT A TEST SHOWS. Water in adulterative quantities in 16 samples. A deficiency of cream found in the same samples. Starch found in one sample. Lead found in one sample. Chalk found in one sample. Salicylic acid found in one sample. Glycerin found in one sample. Gums of consumption found in one sample. Hood and pus corpuscles (matter) in one sample.

The cow with the iron tail! It is long furnished the humorous and whimsical illustration of his monotonous grind, and as a matter of fact, water is by far the most common adulterant, though it is not often added to the milk, but generally in the form of skim milk, which is then added to the whole milk. Skim milk is not often watered. An interesting point was raised on this question when, some years ago, a milkman in Allegheny distributed through the city a paper that was read before the County Medical Society, and which was published in full in the DISPATCH some excellent advice on this and other allied points.

In London, it was, a few years ago, a common thing for the dairymen to drive their cows to the door of the dairymen's customers, where the lactical fluid is withdrawn under the eye and immediate supervision of the purchaser. This is one very effective method of preventing sophistication of milk, though, on the whole, it is not to be recommended, because of the injury done to the cow and her milk by driving her through the streets. A better plan is to have the milk drawn from the cow in a tank which on standing yields a good layer of rich cream. You will have to pay a little more for it, but what is a cent or two a day when you are considering a matter of sick-ness, and the cost of a doctor's bill, and the expense of the milk?

Always the Best. The fact of the deficiency of cream in one-half of all samples examined is a rather startling showing, and yet the estimation is based on a low standard of requirements, lower than that of the milk of an average cow in good health. In four instances the quantity of fatty matter fell so low as to indicate the milk to be skim milk. In two of these instances the milk looked almost as rich as cream, but the color was due to annatto or cheese color. It is to the credit of the dairymen that this is not used even when it is kept in the house of a great many farmers and dairymen who use it to color butter with. The use of it in genuine butter is not reprehensible, since it gives an appealing appearance to a pure product, but when used in milk or cream it is with the object of selling skim milk for more than it is worth. Good cream or whole milk is always yellow in proportion to its quality, and is, therefore, often not, especially in winter time; hence the need of a coloring matter.

The starch present in one sample had been cooked in the milk, and the milk thickened what was really skim milk colored with annatto. The lead present in one instance probably came from the solder or the lining of the can, or from the milk itself, which fact may somewhat surprise the comic writers in writing criticisms on chalky milk.

Salicylic acid found in one instance had probably been added to render possible the keeping of the milk for a longer time than can usually be done. Its use, if not for this purpose, is deleterious, and its addition to milk is very reprehensible, especially on account of the large amount usually consumed by tender infants. True, it is used in medicine, but in that case it is used in small quantities, and is not used in the milk. There is no known article for cents that will so help through house cleaning and Colatum is a peculiar state of the milk.

BRUSH AND PALETTE.

Interest Taken in the Art Exhibit in the Exposition Galleries.

A GROWING APPRECIATION OF ART

Mention of Some of the More Important Paintings Displayed.

GOSSIP ABOUT OUR LOCAL ARTISTS

The interest attaching to the art exhibit at the Exposition galleries shows no signs of abating, but seems rather to be increasing day by day. This, however, so far from being a matter that need excite surprise, is only what might reasonably be expected considering the character and extent of the display. We have had many exhibitions of pictures in this city at which were shown the splendid work of painters from all over the world, and we have had a great variety of paintings and drawings of an equal order of merit being gathered together under one roof and established under conditions so favorable to their inspection and study. That this fact is appreciated by vast numbers of intelligent and refined people is fully evidenced by the crowds that do not show any signs of weariness, and it does not require a particularly astute observer to note that a very considerable proportion of the visitors exercise a nice discrimination between work which is masterly and that which is inferior. And this discrimination in turn indicates that the taste in art of those for whom the galleries provide is becoming more refined and intelligent.

Nothing in the Case. Agent O'Brien of the Humane Society, reports that he discovered nothing at the Scottland pigeon shoot on Friday, which did not show any signs of tampering with the birds.

SOME NOTABLE PICTURES. Although mention has already been made of many of the most noted works, still many others are worth of notice, as at each visit to the galleries something new and striking may be observed in pictures that were not seen on a previous visit.

EDUCATIONAL. NIGHT SCHOOL. HOLY GHOST COLLEGE. FIRST MONTH OF OCTOBER. NAZARETH HALL. NAZARETH HALL. MORAVIAN BOARDING SCHOOL. NAZARETH HALL.

MISS EDNA BRIDGEMAN. The school at the Mountain Academy, under the direction of the Sisters of Mercy will commence its fall term on September 22nd.

PLenty of Light.

Where the New Electric Towers Will Be Located in Allegheny.

Most of the new electric light towers in Allegheny will be 150 feet high, a few, however, not overtopping 125 feet.

Five-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two-light towers—Locust and School streets, Grand avenue and Rebecca street, Hemlock between Poplar and Elysian streets, Federal street and North avenue, and Sycamore streets, Spring Garden near Vinal street, Main and Pine streets, Spring Garden and Logan streets, Lowry and Clark streets, Ridge avenue and Prairie street, Charters and Park streets, California and Shady avenues, Elm and Ohio avenues, Treble avenue and Pine street, Madison avenue and East street, East and Cross streets, Charles and Hoop's lane, Perryville and Lincoln streets, Lincoln and Littlewood avenues, Lanark street and Cemetery avenue, Charles street and Perryville avenue, Lincoln street and Kirkpatrick avenue, McKean street and Charley street.

Ten three-light towers—Pine and Elm streets, Federal street and North avenue, Lowry and Nipei street, Margaret street near California street, Charters and Park streets, California and Shady avenues, Elm and Ohio avenues, Treble avenue and Pine street, Madison avenue and East street, East and Cross streets, Charles and Hoop's lane, Perryville and Lincoln streets, Lincoln and Littlewood avenues, Lanark street and Cemetery avenue, Charles street and Perryville avenue, Lincoln street and Kirkpatrick avenue, McKean street and Charley street.

Two four-light towers—Locust and School streets, Grand avenue and Rebecca street, Hemlock between Poplar and Elysian streets, Federal street and North avenue, and Sycamore streets, Spring Garden near Vinal street, Main and Pine streets, Spring Garden and Logan streets, Lowry and Clark streets, Ridge avenue and Prairie street, Charters and Park streets, California and Shady avenues, Elm and Ohio avenues, Treble avenue and Pine street, Madison avenue and East street, East and Cross streets, Charles and Hoop's lane, Perryville and Lincoln streets, Lincoln and Littlewood avenues, Lanark street and Cemetery avenue, Charles street and Perryville avenue, Lincoln street and Kirkpatrick avenue, McKean street and Charley street.

Two five-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two six-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two seven-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two eight-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two nine-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two ten-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two eleven-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twelve-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two thirteen-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two fourteen-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two fifteen-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two sixteen-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two seventeen-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two eighteen-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two nineteen-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twenty-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twenty-one-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twenty-two-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twenty-three-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twenty-four-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twenty-five-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twenty-six-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twenty-seven-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twenty-eight-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two twenty-nine-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two thirty-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.

Two thirty-one-light towers—Federal and Locust streets, Federal street and North avenue, Western avenue and railroad bridge, North avenue and Monongahela street, Grand avenue and Western street, West Jefferson avenue and Fremont street, West Jefferson and Monterey streets, Arde and Jackson streets, Ohio and James streets, North and Madison avenues, Pennsylvania avenue and Steadwick street, Beaver street and Stanton avenue, Charters street and Washington street.
